1.0 Description of the Procedure, Product, or Service

Obstetrical Services are antepartum care, labor and delivery, and postpartum care. Standards of care are published by the American College of Obstetricians and Gynecologists (ACOG), Centers for Disease Control (CDC), and the American College of Nurse Midwifery (ACNM) for the perinatal care of the pregnant beneficiary.

1.1 Definitions

a. Obstetrics- A branch of medical science that deals with pregnancy, childbirth, and the postpartum period.

b. High risk pregnancy- A pregnancy that threatens the health or life of the pregnant beneficiary or the fetus, often requiring specialized care. Risk factors for high-risk pregnancy can include existing health conditions, overweight and obesity, multiple births and young or old maternal age.

c. Pregnancy complication- Any condition that may be problematic or detrimental to the well-being or health of the pregnant beneficiary or the unborn fetus.

d. Ambulatory Antepartum Care- Medically necessary pregnancy related health care services that are provided on an outpatient basis.
e. **Cesarean Delivery (C-Section)** - The surgical delivery of a baby by an incision through the pregnant beneficiary’s abdomen and uterus.

f. **Certified Registered Nurse Anesthetist (CRNA)** when the anesthesiologists, or the Certified Registered Nurse Anesthetist (CRNA), is available in the facility in the event they are needed for a procedure requiring anesthesia but is not physically present or providing services. The anesthesia provider may not provide care or services to other patients during this time. Anesthesia standby may be necessary in obstetric emergencies, such as with breech presentation or twin delivery.

### 2.0 Eligibility Requirements

#### 2.1 Provisions

##### 2.1.1 General

*The term “General” found throughout this policy applies to all Medicaid policies*

a. An eligible beneficiary shall be enrolled in the NC Medicaid Program *(Medicaid is NC Medicaid program, unless context clearly indicates otherwise)*

b. Provider(s) shall verify each Medicaid beneficiary’s eligibility each time a service is rendered.

c. The Medicaid beneficiary may have service restrictions due to their eligibility category that would make them ineligible for this service.

##### 2.1.2 Specific

*The term “Specific” found throughout this policy only applies to this policy*

a. **Medicaid**

   1. **Regular Medicaid**
      
      In addition to antepartum, labor and delivery, and postpartum care, female beneficiaries in this eligibility category are eligible for full Medicaid coverage. This coverage will extend through at least the last day of the month in which the 12-month postpartum period ends.

   2. **Medicaid for Pregnant Women**
      
      Female beneficiaries with Medicaid for Pregnant Women (MPW) coverage are eligible for antepartum, labor and delivery, and postpartum care in addition to full Medicaid coverage. The eligibility period for MPW coverage ends on the last day of the month in which the 12-month postpartum period ends [NCGA SL 2021-180].

   3. **Undocumented Aliens**
      
      Undocumented aliens shall be eligible for Medicaid for care and services necessary for the treatment of an emergency condition. Services are authorized for actual dates that the emergency services were provided up to a maximum of five calendar days.

      **Note:** The local department of social services in the county where the alien resides determines labor and delivery emergency service coverage dates. NC Medicaid determines coverage eligibility for all other pregnancy related emergencies.
4. **Presumptive Eligibility**

Section 1920(b) of the Social Security Act allows for a pregnant beneficiary who is determined by a qualified provider to be presumptively eligible for Medicaid, to receive ambulatory antepartum care while the beneficiary’s eligibility status is being determined. Presumptive eligibility is determined based on evidence of pregnancy and income only.

The pregnant beneficiary must apply for Medicaid no later than the last day of the month following the month the beneficiary is determined presumptively eligible. If the pregnant beneficiary fails to apply for Medicaid within this time period, the beneficiary is eligible only through the last calendar day of the month following the month the beneficiary is determined presumptively eligible. If the pregnant beneficiary remains presumptively eligible for Medicaid until the local department of social services makes a determination on the beneficiary’s application.

In the case of a beneficiary who does not file an application by the last day of the month following the month during which the provider makes the determination, the presumptive eligibility period ends.

**Note:** Presumptive eligibility is limited to one presumptive eligibility period per pregnancy.

5. **Retroactive Eligibility**

Retroactive eligibility applies to this policy.

### 2.2 Special Provisions

#### 2.2.1 EPSDT Special Provision: Exception to Policy Limitations for a Medicaid Beneficiary under 21 Years of Age

a. 42 U.S.C. § 1396d(r) [1905(r) of the Social Security Act]

Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) is a federal Medicaid requirement that requires the state Medicaid agency to cover services, products, or procedures for Medicaid beneficiary under 21 years of age if the service is **medically necessary health care** to correct or ameliorate a defect, physical or mental illness, or a condition [health problem] identified through a screening examination (includes any evaluation by a physician or other licensed practitioner).

This means EPSDT covers most of the medical or remedial care a child needs to improve or maintain his or her health in the best condition possible, compensate for a health problem, prevent it from worsening, or prevent the development of additional health problems.

Medically necessary services will be provided in the most economic mode; so long as the treatment made available is similarly efficacious to the service requested by the beneficiary’s physician, therapist, or other licensed
practitioner; the determination process does not delay the delivery of the needed service; and the determination does not limit the beneficiary’s right to a free choice of providers.

EPSDT does not require the state Medicaid agency to provide any service, product or procedure:

1. that is unsafe, ineffective, or experimental or investigational.
2. that is not medical in nature or not generally recognized as an accepted method of medical practice or treatment.

Service limitations on scope, amount, duration, frequency, location of service, and other specific criteria described in clinical coverage policies may be exceeded or may not apply as long as the provider’s documentation shows that the requested service is medically necessary “to correct or ameliorate a defect, physical or mental illness, or a condition” [health problem]; that is, provider documentation shows how the service, product, or procedure meets all EPSDT criteria, including to correct or improve or maintain the beneficiary’s health in the best condition possible, compensate for a health problem, prevent it from worsening, or prevent the development of additional health problems.

b. EPSDT and Prior Approval Requirements

1. If the service, product, or procedure requires prior approval, the fact that the beneficiary is under 21 years of age does NOT eliminate the requirement for prior approval.
2. IMPORTANT ADDITIONAL INFORMATION about EPSDT and prior approval is found in the NCTracks Provider Claims and Billing Assistance Guide, and on the EPSDT provider page. The Web addresses are specified below.

NCTracks Provider Claims and Billing Assistance Guide: https://www.nctracks.nc.gov/content/public/providers/provider-manuals.html

EPSDT provider page: https://medicaid.ncdhhs.gov/

3.0 When the Procedure, Product, or Service Is Covered

Note: Refer to Subsection 2.2.1 regarding EPSDT Exception to Policy Limitations for a Medicaid Beneficiary under 21 Years of Age.

3.1 General Criteria Covered

Medicaid shall cover the procedure, product, or service related to this policy when medically necessary, and:

a. the procedure, product, or service is individualized, specific, and consistent with symptoms or confirmed diagnosis of the illness or injury under treatment, and not in excess of the beneficiary’s needs;

b. the procedure, product, or service can be safely furnished, and there is no equally effective and more conservative or less costly treatment is available statewide; and

c. the procedure, product, or service is furnished in a manner not primarily intended for the convenience of the beneficiary, the beneficiary’s caretaker, or the provider.
3.1.1 Telehealth Services
As outlined in Attachment B, select services within this clinical coverage policy may be provided via telehealth. Services delivered via telehealth must follow the requirements and guidance set forth in Clinical Coverage Policy 1-H: Telehealth, Virtual Patient Communications, and Remote Patient Monitoring.

3.2 Antepartum Care
Medicaid shall cover services provided in maternity cases to include antepartum care, delivery, and postpartum care. Confirmation of pregnancy during a problem oriented or preventative care visit is not considered part of antepartum care and the visit must be reported using an appropriate Evaluation and Management code.

3.2.1 Routine Antepartum Visits
Medicaid shall cover the following antepartum care services in an uncomplicated routine obstetrical case:

a. Initial prenatal history and physical exam, subsequent prenatal history, and physical exams. Each antepartum visit routinely consists of the recording of weight, blood pressure and fetal heart tones. Chemical urinalysis, when indicated, is also included in the routine antepartum visit. These services must be covered for an uncomplicated pregnancy in the following frequency:
   1. Monthly visits up to 28 weeks
   2. Biweekly visits from 28 to 36 weeks gestation; and
   3. Weekly visits from 36 weeks until delivery.

Note: The pregnant beneficiary may be seen more frequently if the beneficiary’s condition warrants.

Routine antepartum care is normally billed using a package procedure code in which all antepartum services are combined into one billing code. Refer to Attachment B: Billing for Obstetrical Services.

3.2.2 Non-Routine Individual Antepartum Services
Medicaid shall cover individual itemized antepartum services (use of Evaluation and Management codes). Refer to Attachment B: Billing for Obstetrical Services. These services are covered when one of the following criteria is met:

a. A pregnancy is high risk and requires more than the normal number of services for a routine uncomplicated pregnancy.

b. Less than four antepartum care visits are rendered before delivery.
   
   Note: Hospital-Based Entities as defined by 42 CFR 413.174 must bill individual or package codes as specified in Attachment A: Claims Related Information, antepartum care services without the restrictions of this Subsection.

c. The pregnant beneficiary is seen by a provider between one and three office visits as specified in Attachment B: Billing for Obstetrical Services.
d. A pregnancy is terminated such as with miscarriage, intrauterine fetal demise, or ectopic pregnancy.

**Note:** Local Health Departments (LHDs) who provide high-risk antepartum care shall bill the appropriate Evaluation and Management (E/M) codes for individual antepartum services as specified in **Subsection 3.2.2.**

### 3.2.3 Pregnancy Risk Screening

a. The pregnancy risk screening form must be used to identify a pregnant beneficiary in need of pregnancy care management services.

b. Providers shall complete the pregnancy risk screening form at the beneficiary’s initial visit and follow-up screening any time there is a maternal or fetal change in condition necessitating a new risk assessment. It is recommended that the Pregnancy Risk Screening Form also be completed at the visits closest to 28 weeks gestation and 36 weeks gestation.

c. A Medicaid beneficiary with a priority risk factor present on the pregnancy risk screening form shall be referred for pregnancy care management assessment. A copy of the pregnancy risk screening form must be provided to the high-risk case management agency.

d. A beneficiary shall be eligible to receive pregnancy care management services at any time during pregnancy or the post delivery period which ends on the last day of the month during which the 60th day post-delivery occurs.

**Note:** The Pregnancy Risk Screening Form can be found on the following website: [https://medicaid.ncdhhs.gov/care-management/care-management-high-risk-pregnancies-cmhrp](https://medicaid.ncdhhs.gov/care-management/care-management-high-risk-pregnancies-cmhrp)

### 3.2.4 Counseling

Refer to clinical coverage policy 1M-3, *Health and Behavioral Intervention* at [https://medicaid.ncdhhs.gov/](https://medicaid.ncdhhs.gov/), for information on counseling services for behavioral intervention including substance use.

Refer to clinical coverage Policy, IE-7, *Family Planning* at [https://medicaid.ncdhhs.gov/](https://medicaid.ncdhhs.gov/), for information related to family planning counseling services.

Refer to clinical coverage policy 1-I, *Dietary Evaluation and Counseling and Medical Lactation Services* at [https://medicaid.ncdhhs.gov/](https://medicaid.ncdhhs.gov/), for information on dietary counseling and medical lactation services.
3.2.4.1 Tobacco Cessation Counseling

Tobacco use screening should be provided to all pregnant beneficiaries and an appropriate referral made for those willing to quit and a brief motivational intervention for those not ready to quit.

Tobacco Cessation Counseling services may be billed by Physicians, Nurse Practitioners (NP), Physician Assistants (PA) and Certified Nurse Midwives enrolled under their own NPI (National Provider Identifier) number. LHDs may also provide screening and counseling by a qualified Registered Nurse (RN) who has demonstrated all competency and certification in the tobacco cessation program in use in their agency and billed under their supervising Physician, NP, or PA NPI.

3.2.5 Fetal Surveillance Testing

Medicaid shall cover medically necessary fetal surveillance testing. Refer to clinical coverage policies 1E-4, Fetal Surveillance, at https://medicaid.ncdhhs.gov/ for additional information.

3.2.6 Case Management

Case management services for pregnant beneficiaries are covered through NC Medicaid’s clinical coverage policy 1E-6, Pregnancy Management Program (PMP) for beneficiaries assessed as high-risk and clinical coverage policy 12B, Human Immunodeficiency Virus (HIV) Case Management policy.

3.2.7 Vaccinations

Medicaid shall cover vaccinations for pregnant beneficiaries who do not have evidence of immunity, and other vaccinations during pregnancy and the postpartum period. Providers shall follow guidance related to maternal vaccines, found on the Center for Disease (CDC) website at https://www.cdc.gov/vaccines/pregnancy/hcp-toolkit/guidelines.html. Vaccinations are covered for beneficiaries with MPW eligibility and traditional Medicaid.

Rho D immune globulin (RhoGAM) is a medication given to prevent Rhesus (Rh) hemolytic disease of the newborn (HDN). HDN is a serious, often fatal disease caused by incompatibility between a Rh-negative female beneficiary and the beneficiary’s Rh-positive fetus. Rh (D) blood typing and antibody testing is covered for all female beneficiaries during their first visit for pregnancy related care. Repeated Rh (D) antibody testing for all unsensitized Rh(D) negative female beneficiaries is also covered at 24 to 28 weeks gestation (unless the biological father is known to be Rh (D) negative) and then covered again in the postpartum period. Coverage for RhoGAM is also available for any antepartum fetal-maternal bleeding, actual or threatened pregnancy loss at any stage of gestation, and with an ectopic pregnancy. RhoGAM is covered for female beneficiaries with MPW eligibility and traditional Medicaid.

3.3 Package Services

3.3.1 Antepartum Care Package Services

Medicaid shall cover antepartum package services when the attending provider rendering the antepartum care does not perform the delivery. The attending
provider or group provider shall have rendered at least four antepartum care visits to the pregnant beneficiary prior to delivery.

Note: Individual antepartum visits are not covered in conjunction with antepartum package services. Refer to Attachment A, Claims-Related Information, for billing instructions.

3.3.2 Global Obstetrics Package Services
Antepartum care, labor and delivery, and postpartum care are covered as an all-inclusive service when:

a. at least 4 antepartum care visits were rendered before the delivery and
b. the same provider who renders the antepartum care performs the delivery and postpartum care.

3.3.3 Postpartum Care Package Services
The postpartum period normally lasts six to eight weeks following delivery. Postpartum package services are covered when the attending provider:

a. has not provided any antepartum care, but performed the delivery, and
b. has not provided any antepartum care, and did not perform the delivery, but performs all postpartum care; or

c. bills individual visits for antepartum care due to a high-risk condition.

Note: Prenatal and postpartum visits conducted via telehealth (interactive audio and video) shall count as a visit within a global or package service. Telephone calls or online communications do not replace a telehealth or in person visit for prenatal care and do not count towards global or package services.

3.4 Consultations
Medicaid shall cover inpatient and outpatient consultations when health records substantiate that the services are medically necessary. This applies to a pregnant beneficiary with traditional Medicaid and MPW eligibility.

Refer to clinical coverage policies 1M-6, Maternal Care Skilled Nurse Home Visit and 1M-5, Home Visit for Postnatal Assessment and Follow-up Care, at https://medicaid.ncdhhs.gov/ for additional information on these services.

These services require a physician’s referral. The Maternal Care Skilled Nurse Home Visit policy requires that the client be referred by their prenatal care physician or physician extender (certified nurse midwife, nurse practitioner, physician assistant).

3.5 Labor and Delivery Services
Medicaid shall cover the labor and delivery process of delivering a baby, the placenta, membranes and umbilical cord from the uterus to the outside world. This includes vaginal delivery with or without episiotomy and Cesarean delivery. Assisted vaginal delivery includes help with the use of forceps or vacuum device when necessary.

Cesarean Delivery (C-Section) is performed when it is determined to be a safer method than a vaginal delivery for the pregnant beneficiary and the baby.
In the absence of maternal or fetal indications for cesarean delivery, a plan for vaginal delivery should be recommended. Elective cesarean delivery by maternal request in the absence of indications for early delivery, should not be performed before 39 weeks gestational age, and the pregnant beneficiary should be counseled regarding the risks of placenta previa, placenta accreta spectrum, and gravid hysterectomy with each subsequent cesarean delivery.

**Note:** When there are extenuating circumstances and a certified or licensed provider other than the attending provider or provider group performs the episiotomy, it may be covered as a separate procedure. When a provider other than the delivering provider or provider group performs the delivery of the placenta, it may be covered as a separate procedure. Refer to **Section 5.0, Requirements for and Limitations on Coverage,** for additional information.

### 3.5.1 Anesthesia

Anesthesia services are covered separately. Refer to clinical coverage policy 1L-1, *Anesthesia Services,* at [https://medicaid.ncdhhs.gov/](https://medicaid.ncdhhs.gov/) for information on anesthesia and obstetrics.

### 3.5.2 Complications Related to Delivery

Medicaid shall cover complications related to delivery when the diagnosis substantiates medical necessity.

### 3.5.3 Multiple Gestation Deliveries

If the pregnant beneficiary delivers multiple babies, vaginally or by C-section, the appropriate modifiers and diagnosis codes must be used for reimbursement. Refer to **Attachment A, Claims-Related Information.**

### 3.5.4 Stand-by Services

Anesthesia physician’s or certified registered nurse anesthetist’s (CRNA’s) stand-by service is covered for anesthesia services. This service is available only for physician stand-by services at high-risk deliveries. Only stand-by services related to the pregnant beneficiary can be billed. The service must be requested by a physician, and a diagnosis substantiating the high risk must be documented on the claim Health records documenting the high-risk delivery and the need for stand-by services are not required with the claim submission but must be available for NC Medicaid or DHHS fiscal contractor upon request.

Medicaid shall cover stand-by services for:

a. Care provided to the pregnant beneficiary during a high-risk delivery; and

b. Attendance at delivery and initial stabilization of the newborn during a high-risk delivery (refer to **Attachment A,** letter C (Codes), c (tables)).

### 3.6 Postpartum Care

Postpartum care services encompass management of the beneficiary immediately after delivery and during the six to eight-week period following delivery. Components of this service may consist of a postpartum examination and contraceptive counseling. Contraceptive counseling is a component of the postpartum visit and is not separately reimbursable.
Medicaid covers medically approved family planning methods to prevent conception for beneficiaries with traditional Medicaid or MPW coverage during their postpartum eligibility period. Refer to clinical coverage policy 1E-7 Family Planning Services at https://medicaid.ncdhhs.gov/, for Medicaid covered contraceptive services.

For female beneficiaries with MPW Medicaid, postpartum care services are covered during their eligibility period which ends on the last day of the month in which the 12-month postpartum period ends.

**Note:** For continued services after the 12-month postpartum period ends, refer MPW beneficiaries to the Department of Social Services for continuing eligibility determination.

### 3.6.1 Postpartum Depression Screening

Appropriate maternal depression screening with scientifically validated screening tools is necessary to ensure that postpartum depression is addressed, and care is administered in a timely manner to improve quality of care and long-term outcomes for both female beneficiary and child. Maternal depression screening identifies female beneficiaries with depression and may lead to initiation of treatment or discussion of referral strategies to mental health providers for appropriate treatment.

Obstetric, family practice, and pediatric providers may be reimbursed for three brief emotional behavioral assessments, with scoring and documentation, per standardized instrument – during the first year after the delivery date or until the beneficiary eligibility ends, in addition to global obstetrics and postpartum package services. If a problem is identified, the female beneficiary shall be referred to their primary care provider or other appropriate providers.

**Note:** Medicaid for Pregnant Women (MPW) eligibility ends the last date of the month in which the 12-month postpartum period ends.

**Note:** Refer to Attachment B (C) Postpartum Services for guidance related to postpartum depression screening.

### 3.7 Hybrid Telehealth Visit with Supporting Home Visit

Physicians, nurse practitioners, physician assistants and certified nurse midwives shall conduct antepartum or postpartum care via a telehealth visit with a supporting home visit made by an appropriately trained, delegated staff person when medically necessary.

Reimbursement for this care model is open to both new and established patients. The supporting delegated staff person may perform vaccinations in the home, subject to compliance with all applicable requirements for vaccinations (it is within delegated staff person’s scope of practice to administer vaccinations) and may conduct other tests or screenings, as appropriate. Refer to Attachment B, Letter E for billing guidance.
3.8 United States Preventive Services Task Force (USPSTF) Recommendations

NC Medicaid encourages screening for the following United States Preventative Services Task Force (USPSTF) recommendations in all pregnant beneficiaries.

a. Asymptomatic bacteriuria using urine culture.

b. Hepatitis B virus (HBV) and Hepatitis C virus (HCV) infection at the first prenatal visit.

c. HIV infection, including those presenting in labor or at delivery whose HIV status is unknown.

d. Preeclampsia with blood pressure measurements throughout pregnancy.

e. Appropriate use of low-dose aspirin (81 mg/d) as preventive medication after 12 weeks gestation in women who are at high risk for preeclampsia.

f. Gestational diabetes mellitus in asymptomatic pregnant women after 24 weeks gestation.

g. Syphilis infection.

h. Rh (D) blood typing and antibody testing during the first visit for pregnancy related care. (Refer to section 3.6.1 Vaccinations for specific details).

i. Repeated Rh (D) antibody testing for all unsensitized Rh (D)-negative women at 24 to 28 weeks’ gestation, unless the biological father is known to be Rh (D) negative. (Refer to section 3.6.1 Vaccinations for specific details).

j. Tobacco use, advising pregnant beneficiaries to stop using tobacco, and providing behavioral interventions for cessation to those beneficiaries who use tobacco. (Refer to Attachment B (F) Tobacco Cessation Counseling) for guidance related to billing.

k. Intention to breastfeed, providing breastfeeding interventions and support during pregnancy and after birth.

l. Perinatal depression, providing or referring pregnant and postpartum-beneficiaries who are at increased risk of perinatal depression for counseling interventions.

4.0 When the Procedure, Product, or Service Is Not Covered

Note: Refer to Subsection 2.2.1 regarding EPSDT Exception to Policy Limitations for a Medicaid Beneficiary under 21 Years of Age.

4.1 General Criteria Not Covered

Medicaid shall not cover the procedure, product, or service related to this policy when:

a. the beneficiary does not meet the eligibility requirements listed in Section 2.0

b. the beneficiary does not meet the criteria listed in Section 3.0

c. the procedure, product, or service duplicates another provider’s procedure, product, or service; or

d. the procedure, product, or service is experimental, investigational, or part of a clinical trial.
4.2 Specific Non-Covered Criteria

4.2.1 Non-Covered Services
a. Duplications of OB services;
b. Home pregnancy tests;
c. Ultrasounds performed only for determination of gender of fetus or to provide a keepsake picture;
d. Paternity testing;
e. Parenting classes;
f. Home tocolytic infusion therapy; and
  g. More than 3 pregnancy risk screenings per pregnancy.

4.2.2 Non-Emergency Services for Undocumented Aliens
a. Medicaid shall not cover specific antepartum and postpartum services for undocumented aliens who are only eligible for emergency services.
b. Sterilization procedures are not defined as emergency services and therefore shall not be covered for undocumented aliens.
c. Specific procedures are covered only in an emergency, such as an ectopic pregnancy.

4.3 Stand-by Services
a. Medicaid shall not cover stand-by services for pre-anesthesia evaluations.
b. Medicaid shall not cover stand-by services for the female beneficiary and for the newborn when provided by the same provider.

5.0 Requirements for and Limitations on Coverage

Note: Refer to Subsection 2.2.1 regarding EPSDT Exception to Policy Limitations for a Medicaid Beneficiary under 21 Years of Age.

5.1 Prior Approval for MPW Beneficiaries

Medicaid shall not require prior approval for Obstetric Services.

Refer to clinical coverage policies at https://medicaid.ncdhhs.gov/ for specific requirements for prior approval for non-Obstetric services.

5.2 Limitations
a. The following limitations apply to obstetric care services.
b. Individual delivery procedures (vaginal delivery and delivery of placenta) are not covered more than once in a 225 consecutive calendar day period.

Note: When there is more than one pregnancy within 225 consecutive calendar days and both pregnancies result in separate deliveries on different dates of service within 225 consecutive calendar days, the service is covered.
c. Antepartum care package services are covered once during the beneficiary’s pregnancy. In special circumstances (such as when the pregnant beneficiary moves), up to three different providers may bill for antepartum care 4–6 visits. This does not apply to different providers in the same group.
d. Postpartum care services are covered through the end of the month in which the 12-month postpartum period ends after vaginal and cesarean delivery. Refer to Subsection 3.6, Postpartum Care.

e. Stand-by services related to a pregnant beneficiary for a high-risk delivery are limited to two hours per day.

f. Performance of an episiotomy or delivery of a placenta by a provider other than the attending provider is covered only through the paper adjustment process.

6.0 Provider(s) Eligible to Bill for the Procedure, Product, or Service

To be eligible to bill for the procedure, product, or service related to this policy, the provider(s) shall:

a. meet Medicaid qualifications for participation;

b. have a current and signed Department of Health and Human Services (DHHS) Provider Administrative Participation Agreement; and

c. bill only for procedures, products, and services that are within the scope of their clinical practice, as defined by the appropriate licensing entity.

6.1 Provider Qualifications and Occupational Licensing Entity Regulations

None Apply.

6.2 Provider Certifications

None Apply.

7.0 Additional Requirements

Note: Refer to Subsection 2.2.1 regarding EPSDT Exception to Policy Limitations for a Medicaid Beneficiary under 21 Years of Age.

7.1 Compliance

Provider(s) shall comply with the following in effect at the time the service is rendered:

a. All applicable agreements, federal, state and local laws and regulations including the Health Insurance Portability and Accountability Act (HIPAA) and record retention requirements; and

b. All NC Medicaid’s clinical (medical) coverage policies, guidelines, policies, provider manuals, implementation updates, and bulletins published by the Centers for Medicare and Medicaid Services (CMS), DHHS, DHHS division(s) or DHHS fiscal contractor(s).
8.0 Policy Implementation/Update Information

Attachment A: Claims-Related Information

Provider(s) shall comply with the, NCTracks Provider Claims and Billing Assistance Guide, Medicaid bulletins, fee schedules, NC Medicaid’s clinical coverage policies and any other relevant documents for specific coverage and reimbursement for Medicaid:

A. Claim Type

Professional (CMS-1500/837P transaction)
Institutional (UB-04/837I transaction)

Unless directed otherwise, Institutional Claims must be billed according to the National Uniform Billing Guidelines. All claims must comply with National Coding Guidelines.

B. International Classification of Diseases and Related Health Problems, Tenth Revisions, Clinical Modification (ICD-10-CM) and Procedural Coding System (PCS)

Provider(s) shall report the ICD-10-CM and Procedural Coding System (PCS) to the highest level of specificity that supports medical necessity. Provider(s) shall use the current ICD-10 edition and any subsequent editions in effect at the time of service. Provider(s) shall refer to the applicable edition for code description, as it is no longer documented in the policy.

Refer to “Billing for Multiple Births” in Attachment A (E) for ICD-10-CM requirements for billing Multiple Births.

C. Code(s)

a. Provider(s) shall report the most specific billing code that accurately and completely describes the procedure, product or service provided. Provider(s) shall use the Current Procedural Terminology (CPT), Health Care Procedure Coding System (HCPCS), and UB-04 Data Specifications Manual (for a complete listing of valid revenue codes) and any subsequent editions in effect at the time of service. Provider(s) shall refer to the applicable edition for the code description, as it is no longer documented in the policy.

If no such specific CPT or HCPCS code exists, then the provider(s) shall report the procedure, product or service using the appropriate unlisted procedure or service code.

b. Information for reimbursement of PMP procedure codes (S0280 Medical home program, comprehensive care coordination and planning, initial plan and S0281 Medical home program, comprehensive care coordination and planning, maintenance of plan) shall be found in clinical coverage policy 1E-6, Pregnancy Management Program at https://medicaid.ncdhhs.gov/. PMP providers shall bill according to the specifications in the table below. Indian Health Service PMP-providers bill RC 510, S0280, and S0281 for reimbursement for PMP services.

1. Local Health Departments (LHDs) who provide only antepartum and postpartum care for pregnancy services shall bill CPT codes 59425, 59426, and 59430 for antepartum and postpartum care.

2. LHDs who provide high-risk antepartum care shall bill appropriate Evaluation and Management (E/M) codes for individual antepartum services as specified in Subsection 3.2.2.
3. LHDs who provide complete antepartum, labor and delivery, and postpartum care by employing or contracting with obstetric providers shall bill 59400, 59409, 59410, 59425, 59426, 59430, 59510, 59514, or 59515.

c. The following table combines obstetrical codes and instructions for physicians, non-physician practitioners (NPP), Local Health Departments (LHD’s), and FQHC/RHC providers. Information for anesthesia providers follows in a separate table.

**Unlisted Procedure or Service**

CPT: The provider(s) shall refer to and comply with the Instructions for Use of the CPT Codebook, Unlisted Procedure or Service, and Special Report as documented in the current CPT in effect at the time of service.

HCPCS: The provider(s) shall refer to and comply with the Instructions for Use of HCPCS National Level II codes, Unlisted Procedure or Service and Special Report as documented in the current HCPCS edition in effect at the time of service.

### D. Modifiers

**Non-Telehealth Claims:** Provider(s) shall follow applicable modifier guidelines.

Telehealth Claims:
Global/Package Billing- Append the GT modifier to the global or package code to indicate that one or more of the visits were conducted via telehealth under that package. This modifier is not appropriate for virtual patient communications or remote patient monitoring.

Individual Visit Billing- When OB services are provided and billed per visit (refer to Section 3.2.2 for billing individual prenatal visits) append GT modifier to each visit conducted via telehealth. This modifier is not appropriate for virtual patient communications or remote patient monitoring.
E. Billing for Multiple Births

The appropriate multiple gestation diagnosis code must be reported on the claim for reimbursement.

<table>
<thead>
<tr>
<th>Gestation</th>
<th>ICD-10-CM Code(s)</th>
<th>Additional Units to Be Billed</th>
</tr>
</thead>
</table>

In addition to the multiple gestation diagnosis code, the correct delivery codes are also required.

</tr>
</tbody>
</table>

**Note:** For multiple births of more than four infants, submit the first claim electronically. It denies with a request for operative notes. Submit the second claim as an adjustment with operative notes attached.

**F. Place of Service**

Inpatient hospital, Outpatient hospital, Office, Birthing Center

Telehealth claims should be filed with the provider’s usual place of service code(s) and not place of service 02 (Telehealth).

**G. Co-payments**

For Medicaid refer to Medicaid State Plan:

https://medicaid.ncdhhs.gov/get-involved/nc-health-choice-state-plan

**H. Reimbursement**

Provider(s) shall bill their usual and customary charges. For a schedule of rates, refer to: https://medicaid.ncdhhs.gov/
Attachment B: Billing for Obstetrical Services

CPT procedure codes 81000 and 81002 for chemical urinalysis may not be reimbursed separately if billed with CPT codes 59400, 59410, 59425, 59426, 59430, 59510, or 59515 by the same billing provider.

A. Billing Individual Evaluation and Management Antepartum Services

Billing of individual antepartum services using Evaluation and Management (E/M) codes in the table below are covered in the following circumstances:

a. An obstetrical beneficiary is seen by the obstetric provider between one (1) and three (3) visits. The visits shall be billed using E/M CPT codes, according to the services that were provided. These visits must be billed after it is apparent the beneficiary is no longer a patient of the specific provider or if the pregnancy becomes high-risk before the fourth (4th) obstetric visit. If the beneficiary is new to the provider, codes 99202-99205 must be reported for the new patient initial visit. E/M codes 99211-99215 for an established patient must be reported for the next two visits.

b. Services provided to a pregnant beneficiary with an acute medical condition unrelated to the pregnancy in the provider’s office or in an outpatient or other ambulatory facility. Services to treat unrelated conditions are billed with E/M service codes at the time they are rendered. The appropriate E/M code from the table in Attachment B (A) below must be linked with a diagnosis that identifies the unrelated condition. A global or package obstetric code is billed at the end of the pregnancy.

c. When services are provided to a pregnant beneficiary with an acute medical condition related to the pregnancy in the provider’s office or in an outpatient or other ambulatory facility. Services to treat related conditions are billed with E/M service codes at the time they are rendered. The appropriate E/M code from the table in Attachment B (A) below must be linked with a diagnosis that identifies the related condition. A global or package obstetric code is billed at the end of the pregnancy.

d. A pregnancy becomes high-risk after the pregnant beneficiary has been seen for normal obstetric visits, CPT code 59425 must be billed according to the appropriate number of visits. Appropriate E/M codes from the table in Attachment B (A) below may also be billed in conjunction with code 59425 according to the additional number of high-risk obstetric visits.

e. A pregnancy is high risk and requires more than the normal amounts of services for a routine pregnancy. Additional high-risk visits (over the usual 13) to treat complications of the pregnancy must be billed after the pregnant beneficiary delivers with a delivery date on the claim. For Professional (CMS-1500/837P transaction) claims, the delivery date must be placed in box #18 “Hospitalization dates related to current services.” For Institutional (UB-04/837I transaction) claims, the delivery date must be placed in box #31 “Occurrence Date.”

f. Additional high-risk visits for complications must be linked to an appropriate diagnosis code. If a high-risk pregnant beneficiary is seen more often than usual, but no complications develop, individual E/M codes must not be billed separately. A global or package obstetric code must be used.

g. Pregnancy results in a spontaneous pregnancy loss (miscarriage), intrauterine fetal demise or ectopic pregnancy.
Note: E/M services provided to a pregnant beneficiary in addition to global or package obstetric codes in excess of three visits must require submission of health record documentation to support medical necessity.

</tbody>
</table>

B. Billing Observation and Inpatient Services
   a. There are services provided to a pregnant beneficiary with an acute medical condition related or unrelated to the pregnancy under observation status. If the pregnant beneficiary is admitted to observation care, and then delivers within 24 hours of admission, the services must not be billed using individual E/M codes. Global Package, or Individual Obstetrical codes as specified in Attachment A: Claims- Related Information must be used.
   b. There are services provided to a pregnant beneficiary with an acute medical condition related or unrelated to the pregnancy who is admitted to the hospital as an inpatient. If the pregnant beneficiary is admitted to inpatient care and subsequently delivers within 24 hours of admission, the services must not be billed using individual E/M codes. Global Package, or Individual Obstetrical codes as specified in Attachment A: Claims- Related Information must be used.
   c. There are services provided to a pregnant beneficiary with an acute medical condition related or unrelated to the pregnancy which complicates the pregnancy and results in observation or inpatient care during pregnancy and greater than 24 hours prior to delivery. These services shall be billed using the appropriate E/M code as specified in the table in Attachment B (A) above. These services shall be billed in addition to the Global package.

C. Billing Postpartum Services
   Postpartum visits are billed with global codes or postpartum package codes. Postpartum services are not billed with E/M office visit codes.

   Providers performing postpartum depression screening are required to bill diagnosis Z13.32 (Encounter for screening for maternal depression) in combination with one of the CPT codes below:
## Additional Billing Guidance for FQHCs, FQHC-Lookalikes and RHC’s

a. Postpartum screenings delivered as part of an obstetrics care visit are covered under core obstetrics billing (T1015) and not billed separately.
b. Postpartum depression screening delivered as part of Well Child visits are reimbursed on a fee-for-service basis and should be billed using CPT 96161.

## D Billing Prenatal and Postpartum Services Via Telehealth

Eligible providers, including physicians, nurse practitioners, physician assistants, and certified nurse midwives may conduct antepartum and postpartum care visits via telehealth. These visits may not be conducted via virtual patient communication (e.g., telephone conversations). In order to promote early initiation of prenatal care, providers shall conduct the initial antepartum visit and pregnancy risk screen via telehealth or in-person in the office or clinic setting. When the initial visit is conducted via telehealth, a follow-up visit should be conducted in person within the first trimester of pregnancy.

a. **Providers Billing Global OB or Package Codes:**
   1. The following table of Global and Package CPT codes contains services that may be rendered via telehealth. A limited number of services may be offered via telehealth and billed for new and established patients.
   2. The code billed must be appended with the GT modifier to indicate that at least one visit was conducted via telehealth. This modifier is not appropriate for services performed telephonically or through patient portal. In addition, telephone calls or online communications do not replace a telehealth or in person visit for prenatal care and do not count towards global or package services.

**Note:** FQHCs, FQHC Look-Alikes and RHCs that bill T1015 for perinatal services may render some of these services via telehealth.

</table>
Codes | Description (See 2020 CPT Code Book for Complete Details)
--- | ---
59400 | Routine obstetric care, including antepartum care, vaginal delivery (with or without episiotomy, and/or forceps) and postpartum care
59510 | Routine obstetric care including antepartum care, cesarean delivery, and postpartum care
59410 | Vaginal delivery only (with or without episiotomy and/or forceps); including postpartum care
59515 | Cesarean delivery only; including postpartum care
59425 | Antepartum care only; 4-6 visits
59426 | Antepartum care only; 7 or more visits
59430 | Postpartum care only; separate procedure

b. Providers Billing Individual Prenatal Visits and Postpartum Care:
   1. An appropriate Office evaluation and management code from the table in Attachment B, Letter A shall be billed for each prenatal visit. This code must be appended with the GT modifier to indicate that the visit was performed via telehealth.
   2. The appropriate postpartum care package code from the table above shall be billed and must be appended with the GT modifier when a postpartum visit was performed via telehealth.

E. Billing for Hybrid Telehealth Visit with a Supporting Home Visit

a. Providers Billing Global OB or Package Codes:
   1. To reflect the additional cost of the delegated staff person attending the patient’s home, eligible providers may bill a telehealth originating site facility fee (HCPCS code Q3014) for each telehealth visit conducted with a supporting visit. The originating site fee shall be billed in addition to the pregnancy global package codes.
   2. To be reimbursed for the originating site facility fee for this care model, all of the following requirements must be met for each home visit:
      i. The assistance delivered in the home must be given by an appropriately trained delegated staff person.
      ii. The fee must be billed with the date of service for which the home visit is conducted.
      iii. HCPCS code Q3014 must be appended with the GT modifier and billed with a place of service “12” to designate that the originating site was the home.
      iv. The antepartum or postpartum hybrid telehealth visit is included in the global or package code for the pregnancy. There is no separate evaluation and management code billing outside of the package or global code for the providers portion of the home visit.

Note: Refer to Clinical Coverage Policy 1-H: Telehealth, Virtual Patient Communications, and Remote Patient Monitoring for more information about originating site facility fees.
b. Providers Billing Individual Prenatal Visits:
   1. Providers should bill the appropriate level Home Service evaluation and management code from the table in Attachment B, Letter A for each telehealth visit with a supporting home visit made by an appropriately trained delegated staff person.
   2. Providers should not bill the originating site facility fee.

F. Billing for Tobacco Cessation Counseling

Providers performing tobacco cessation counseling are required to bill with CPT codes 99406 or 99407 with an appropriate tobacco use disorder diagnosis code.

<table>
<thead>
<tr>
<th>CPT Code</th>
<th>Code Description</th>
<th>Telehealth Eligible Service</th>
</tr>
</thead>
<tbody>
<tr>
<td>99406</td>
<td>Preventive medicine, smoking/tobacco cessation counseling visit; intermediate, greater than 3 minutes up to 10 minutes</td>
<td>Yes</td>
</tr>
<tr>
<td>99407</td>
<td>Preventive medicine, smoking/tobacco use cessation counseling visit; intensive, greater than 10 minutes.</td>
<td>Yes</td>
</tr>
</tbody>
</table>

The Local Health Department (LHD) may bill for a prenatal clinic visit and for tobacco cessation counseling (when provided by qualified staff) on the same day.

Smoking and tobacco cessation counseling is a component of a Core Visit provided by Core Service providers (FQHCs, FQHC Look-Alikes and RHCs) and not separately billable as a core service. Refer to NC Medicaid Clinical Coverage Policy 1D-4, Core Services Provided in Federally Qualified Health Centers and Rural Health Clinics for additional information on Core Service billing.

Tobacco cessation counseling cannot be billed in addition to a postnatal home assessment, skilled nurse visit, newborn home visit, OB Care Manager visit (OBCM), or Care Coordination for Children (CC4C) visit but the service should be offered and the pregnant beneficiary who uses tobacco should be referred to Quitline NC for assistance.

Coverage is not reimbursed for counseling for tobacco cessation in the home setting by any type of provider.
