

Note: DHB will also be able to run metrics on claims submitted for pre-release services. However, these will only indicate that contact was made, not the number of contacts or what occurred during. It is also not likely that this data will be available real-time during the 30 days of pre-release services. JI related claims information will be captured on the existing TCM claims dashboard.

CAA 5121 Post-Release Monitoring – LME/MCO
