Prescribers Not Enrolled in Medicaid

The Affordable Care Act established a new rule that prohibits N.C. Medicaid and Children's Health Insurance Programs [such as N.C. Health Choice (NCHC)] from paying for prescriptions written by prescribers who are not enrolled in Medicaid and NCHC programs.

On January 1st, 2013, pharmacy providers began to receive a message at point-of-sale for prescriptions written by prescribers not enrolled in the Medicaid program. The edit, 00951, states "M/I PRESCR ID - NO ID ON FILE" with EOB 02951 message "PRESCRIBER NPI NOT ON FILE. CONTACT PRESCRIBER AND REFILE WITH CORRECT NPI." Currently claims pay on this edit. **Claims will deny starting on November 1, 2014. This will hold true for original prescriptions and refills.**

Preferred Drug List (PDL) changes are posted for public comment

The Preferred Drug List (PDL) changes for 2014-2015 are posted for public comment through November 3, 2014 and can be viewed at <http://www.ncdhhs.gov/dma/mpproposed/index.htm>. This list will be reviewed at the PDL Public Panel meeting. Details for this meeting will be posted at <http://www.ncdhhs.gov/dma/pharmacy/pdl.htm> when they are made final.

Current Status of A+KIDS Program

Starting in November 2014, safety documentation for A+KIDS (Antipsychotics - Keeping It Documented for Safety) will be transitioning into the NCTracks Provider Portal Website, an online system where providers can submit prior approval requests. The last date that providers will be able to submit A+KIDS safety documentation through www.documentforsafety.com is **October 31, 2014**. The A+KIDS fax form will also remain available.

A widespread educational effort about A+KIDS safety documentation will occur when the NCTracks Provider Portal begins accepting A+KIDS requests.

History of A+KIDS

In April 2011, the N.C. Division of Medical Assistance partnered Community Care of North Carolina to implement a registry to document the use of antipsychotic therapy in N.C. Medicaid and N.C. Health Choice beneficiaries ages 0 through 17. A+KIDS was created due to well-documented safety concerns and limited information about the efficacy of using antipsychotic agents in children. A+KIDS encourages the use of appropriate baseline and follow-up monitoring parameters to facilitate the safe and effective use of antipsychotics in this population.

BRANDS Program to be Suspended

BRANDS (Brand Request-Adverse event Needs Documentation) program found at www.documentforsafety.org will suspend effective November 1, 2014. Information about the continuation or permanent discontinuation of BRANDS will occur at a future date.

The BRANDS program is a prior authorization process that requires documentation of an adverse event experienced by the patient with use of a generic equivalent. The BRANDS application allows the provider to request a brand name medication for a patient and document the adverse effect related to the generic equivalent at the same time.

Skyla and Paragard are available via Point-of Sale Pharmacy

Skyla and Paragard are now available via a prescription from retail pharmacies. Not all pharmacies may carry these products. Please contact the manufacturer for availability.

Procedures for Prior Authorization of Synagis for Respiratory Syncytial Virus (RSV) Season 2014/2015

The clinical criteria utilized by N.C. Medicaid for the 2014/2015 Respiratory Syncytial Virus (RSV) season are consistent with guidance published online July 28, 2014 by the American Academy of Pediatrics (AAP) Committee on Infectious Diseases and Bronchiolitis Guidelines Committee. This revised guidance for Synagis use among infants and children at increase risk of hospitalization for Respiratory Syncytial Virus (RSV) infection found at <http://pediatrics.aappublications.org/content/134/2/415.full.html> replaces the 2012 Red Book 29th edition recommendations.

Prior authorization (PA) is required for Medicaid coverage of Synagis. The coverage season is November 1, 2014 through March 31, 2015. The updated guidelines narrow the criteria for evidence-based use of Synagis. Providers are encouraged to review the new AAP guidance prior to the start of the RSV season. Early and Periodic Screening, Diagnosis and Treatment (EPSDT) criteria are considered for Synagis requests.

Updated Guidelines for Evidenced Based Synagis Prophylaxis:

- Infants younger than 12 months at start of season with diagnosis:
 - Prematurity - born before 29 weeks 0 days gestation
 - Chronic Lung Disease (CLD) of prematurity (defined as birth at less than 32 weeks 0 days gestation and required greater than 21% oxygen for at least 28 days after birth)

- Hemodynamically significant acyanotic heart disease and receiving medication to control congestive heart failure and will require cardiac surgical procedures and; moderate to severe pulmonary hypertension
- Infants with cyanotic heart disease may receive prophylaxis with cardiologist recommendation.
- Infants during first year of life with diagnosis:
 - Neuromuscular disease or pulmonary abnormality that impairs the ability to clear secretions from the upper airways
- Infants less than 24 months of age with diagnosis:
 - Profound immunocompromise during RSV season
 - CLD of prematurity (see above definition) and continue to require medical support (supplemental oxygen, chronic corticosteroid or diuretic therapy) during 6 month period before start of second RSV season
 - Cardiac transplantation during RSV season

PA Request

Submit all PA requests for coverage of Synagis during the coverage period electronically at www.documentforsafety.org. The web-based program will process PA information in accordance with the updated criteria. A PA request can automatically approve based on the criteria submitted. The program allows a provider to self-monitor the status of a request pending medical review. Up to five doses can be approved for coverage. Coverage of Synagis for neuromuscular disease or congenital anomaly that impairs ability to clear respiratory secretions from the upper airway will terminate when the beneficiary exceeds 12 months of age. Coverage of Synagis for CLD, profound immunocompromise or cardiac transplantation will terminate when the beneficiary exceeds 24 months of age.

Dose Authorization

Each Synagis dose will be individually authorized to promote efficient product distribution. After the initial approval, providers must submit a “**next dose request**” to obtain an authorization for each subsequent dose up to the approved number of doses. Providers should ensure the previously obtained supply of Synagis is administered before submitting a next dose request. Providers will fax each single dose authorization to the pharmacy distributor of choice.

If an infant received one or more Synagis doses prior to hospital discharge, the provider should indicate as part of the request the most recent date a dose was administered and the number of doses administered by the provider should be adjusted accordingly. If any infant or young child receiving monthly palivizumab prophylaxis experiences a breakthrough laboratory-confirmed RSV hospitalization, coverage of Synagis will be discontinued.

Pharmacy Distributor Information

Single dose, vial-specific authorizations, up to the maximum number of doses approved for the beneficiary, will be issued by N.C. Medicaid. It is important for the Synagis distributor to have the appropriate single dose authorization on hand and a paid claim prior to shipping Synagis. An individual dose authorization is required for each paid Synagis

claim. The claim should not exceed the quantity indicated on the authorization. Payment for a Synagis claim will be denied if a dose request was not completed by the provider.

Synagis claims processing will begin on October 28, 2014 to allow sufficient time for pharmacies to provide Synagis by November 1, 2014. Payment of Synagis claims with date of service before October 28, 2014 and after March 31, 2015, will not be allowed. Point of sale claims should not be submitted by the pharmacy distributor prior to the first billable date of service for the season. Pharmacy providers should always indicate an accurate days' supply when submitting claims to N.C. Medicaid.

Claims for Synagis doses that include multiple vial strengths must be submitted as a single compound drug claim. Synagis doses requiring multiple vial strengths that are submitted as individual claims will be subject to recoupment. Physicians and pharmacy providers are subject to audits of beneficiary records by the Division of Medical Assistance (DMA). Maintain Synagis dose authorizations in accordance with required record keeping time frames.

Provider Information

Providers without internet access should contact the N.C. Medicaid Outpatient Pharmacy Program at (919)855-4300 to facilitate submission of a PA request for Synagis. More information about the Synagis program is available at: www.documentforsafety.org.

Submitting a Request to Exceed Policy

The provider should use the **Non-Covered State Medicaid Plan Services Request Form for Recipients under 21 Years of Age** to request Synagis doses exceeding policy or for coverage outside the defined coverage period. The form is available on DMA's website at <http://www.ncdhhs.gov/dma/epsdt/>. Information about EPSDT coverage is found at (see <http://www.ncdhhs.gov/dma/epsdt/index.htm>.)

Technical Support

Technical support is available Monday to Friday from 8 a. m. to 5 p.m. at 1-855-272-6576 (local: 919-926-3986). Technical support can assist with provider registration, user name and password issues, beneficiary searches and other registry functions.

72-Hour Emergency Supply Available for Pharmacy Prior Authorization Drugs

Pharmacy providers are encouraged to use the 72-hour emergency supply allowed for drugs requiring prior authorization (PA). *Federal law requires that this emergency supply be available to Medicaid recipients for drugs requiring prior authorization.* [Social Security Act, Section 1927, 42 U.S.C. 1396r-8(d)(5)(B)]. Use of this emergency supply will ensure access to medically necessary medications.

The system will bypass the PA requirement if an emergency supply is indicated. A "3" in the Level of Service field (418-DI) should be used to indicate that the transaction is an emergency

fill. **Please Note: Co-payments will apply and only the drug cost will be reimbursed. There is no limit to the number of times the emergency supply can be used.**

Updated Federal Upper Limit Reimbursement List

Certain drugs have been identified for which the Federal Upper Limit (FUL) reimbursement rate does not cover the cost of the drug. Medicaid pharmacy programs are required to reference this reimbursement information when pricing drug claims. In order to receive adequate reimbursement, pharmacy providers may use the DAW1 override to override the FUL reimbursement rate for the drugs listed on the FUL list until the FUL rate has been adjusted to adequately cover the cost of the drug.

As indicated in previous communications, use of the *DAWI* override code is being monitored. A claim submitted for more than the State Maximum Allowable Cost (SMAC) rate on file may lead to an identifiable overpayment. Any difference between the SMAC rate on file for the date of service and the actual rate applied to the claim (*if higher*) may be considered an overpayment and subject to recoupment.
