1.0 Description of the Procedure, Product, or Service

Chiropractic is the science of adjusting the cause of disease by realigning the spine, releasing pressure on nerves radiating from the spine to all parts of the body, and allowing the nerves to carry their full quota of health current (nerve energy) from the brain to all parts of the body. (G.S. 90-143)

1.1 Definitions

1.1.1 Manipulation

A manual procedure that involves a directed thrust to move a joint past the physiological range of motion, without exceeding the anatomical limit.

1.1.2 Motion Segment

A functional unit made up of the two adjacent articulating surfaces and the connecting tissues binding them to each other.

1.1.3 Subluxation

Subluxation is a motion segment in which alignment, movement integrity, and/or physiological function are altered although contact between joint surfaces remains intact.

2.0 Eligibility Requirements

2.1 Provisions

2.1.1 General

(The term “General” found throughout this policy applies to all Medicaid and NCHC policies)

- a. An eligible beneficiary shall be enrolled in either:
 1. the NC Medicaid Program (*Medicaid is NC Medicaid program, unless context clearly indicates otherwise*); or
 2. the NC Health Choice (*NCHC is NC Health Choice program, unless context clearly indicates otherwise*) Program on the date of service and shall meet the criteria in **Section 3.0 of this policy**.
- b. Provider(s) shall verify each Medicaid or NCHC beneficiary’s eligibility each time a service is rendered.
- c. The Medicaid beneficiary may have service restrictions due to their eligibility category that would make them ineligible for this service.
- d. Following is only one of the eligibility and other requirements for participation in the NCHC Program under GS 108A-70.21(a): Children must be between the ages of 6 through 18.

2.1.2 Specific

(The term “Specific” found throughout this policy only applies to this policy)

a. Medicaid

Medicaid beneficiaries 12 years of age and older are eligible for Chiropractic Services.

Medicaid for Pregnant Women:

Pregnant women with Medicaid for Pregnant Women (MPW) benefits (pink MID card) are eligible for chiropractic services if the service is required for a pregnancy-related condition. Chiropractic services for these beneficiaries must be prior approved (refer to **Subsection 5.1**).

b. **NCHC**

NCHC beneficiaries 12 through 18 years of age are eligible for Chiropractic Services.

2.2 Special Provisions

2.2.1 **EPSDT Special Provision: Exception to Policy Limitations for a Medicaid Beneficiary under 21 Years of Age**

a. **42 U.S.C. § 1396d(r) [1905(r) of the Social Security Act]**

Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) is a federal Medicaid requirement that requires the state Medicaid agency to cover services, products, or procedures for Medicaid beneficiary under 21 years of age **if** the service is **medically necessary health care** to correct or ameliorate a defect, physical or mental illness, or a condition [health problem] identified through a screening examination (includes any evaluation by a physician or other licensed practitioner).

This means EPSDT covers most of the medical or remedial care a child needs to improve or maintain his or her health in the best condition possible, compensate for a health problem, prevent it from worsening, or prevent the development of additional health problems.

Medically necessary services will be provided in the most economic mode, as long as the treatment made available is similarly efficacious to the service requested by the beneficiary’s physician, therapist, or other licensed practitioner; the determination process does not delay the delivery of the needed service; and the determination does not limit the beneficiary’s right to a free choice of providers.

EPSDT does not require the state Medicaid agency to provide any service, product or procedure:

1. that is unsafe, ineffective, or experimental or investigational.
2. that is not medical in nature or not generally recognized as an accepted method of medical practice or treatment.

Service limitations on scope, amount, duration, frequency, location of service, and other specific criteria described in clinical coverage policies may be exceeded or may not apply as long as the provider's documentation shows that the requested service is medically necessary "to correct or ameliorate a defect, physical or mental illness, or a condition" [health problem]; that is, provider documentation shows how the service, product, or procedure meets all EPSDT criteria, including to correct or improve or maintain the beneficiary's health in the best condition possible, compensate for a health problem, prevent it from worsening, or prevent the development of additional health problems.

b. EPSDT and Prior Approval Requirements

1. If the service, product, or procedure requires prior approval, the fact that the beneficiary is under 21 years of age does **NOT** eliminate the requirement for prior approval.
2. **IMPORTANT ADDITIONAL INFORMATION** about EPSDT and prior approval is found in the *NCTracks Provider Claims and Billing Assistance Guide*, and on the EPSDT provider page. The Web addresses are specified below.

NCTracks Provider Claims and Billing Assistance Guide:

<https://www.nctracks.nc.gov/content/public/providers/provider-manuals.html>

EPSDT provider page: <https://medicaid.ncdhhs.gov/>

2.2.2 EPSDT does not apply to NCHC beneficiaries

2.2.3 Health Choice Special Provision for a Health Choice Beneficiary age 6 through 18 years of age

NC Medicaid shall deny the claim for coverage for an NCHC beneficiary who does not meet the criteria within **Section 3.0** of this policy. Only services included under the NCHC State Plan and the NC Medicaid clinical coverage policies, service definitions, or billing codes are covered for an NCHC beneficiary.

- b. the procedure, product, or service can be safely furnished, and no equally effective and more conservative or less costly treatment is available statewide; and

- c. the procedure, product, or service is furnished in a manner not primarily intended for the convenience of the beneficiary, the beneficiary's caretaker, or the provider.

3.2 Specific Criteria Covered

3.2.1 Specific criteria covered by both Medicaid and NCHC

The service must relate to the diagnosis and treatment of a significant health problem in the form of a musculoskeletal condition necessitating manual manipulation.

Note: With the exception of X-rays (refer to **Section 5.3**), no other diagnostic or therapeutic service furnished by a chiropractor or under his or her order is a covered service.

Subluxation

Subluxation must be confirmed by physical examination or by one (1) set of X-rays taken within six (6) calendar months of the initial date of service. To demonstrate a subluxation by physical examination, one or both of the following conditions must be documented:

- a. Asymmetry or misalignment on a segmental or sectional level, **or**
- b. Range of motion abnormality must be demonstrated.

If only one of these two conditions listed above is present, one of the following conditions must also be present:

 - 3. Preventive care or wellness services such as nutritional supplements, hygienic modalities, environmental modalities, rehabilitation and physiotherapeutic modalities, massage therapy, counseling, beneficiary education, home exercises, and ergonomic postural modification.
