Makena Auto-Injector Added as a Preferred Option on the Preferred Drug List

N.C. Medicaid has confirmed the market shortage of Makena Injection Single Dose Vial, which is a preferred option in addition to the 5 ml multi-dose vial on the N.C. Medicaid and N.C. Health Choice Preferred Drug List (PDL).

Due to market access issues that caused this shortage, effective Oct. 22, 2018, Makena Auto-Injector will be moved to preferred status on the N.C. Medicaid and N.C. Health Choice PDL.

PROGESTATIONAL AGENTS	
<u>Preferred</u>	<u>Non-Preferred</u>
Makena® (hydroxyprogesterone caproate injection) Makena® Auto-Injector Compounded 17 P	Makena® Auto-Injector hydroxyprogesterone caproate injection
