

LME/MCO Solvency Dashboard

In accordance with S.L. 2023-134, SECTION 9G.7A.(a11), which enacted General Statute 122C-125.3, on a quarterly basis beginning on April 1, 2024, the Department of Health and Human Services (DHHS) will utilize information from financial reports submitted monthly by each Local Management Entities/Managed Care Organization (LME/MCO) to evaluate each entity's compliance with solvency standards specified in their contract with the State.

The tables below document the DHHS findings for the quarter ending in June 2026 and will be updated each quarter going forward based on the most current previous quarter's available financial data. Note that monthly, quarterly, and annual financials used for this report are subject to change based on the results of LME/MCO audits and/or restated financial reports that are submitted to the Department after the posting date of the dashboard.

Each solvency standard is briefly described, followed by a table that indicates each LME/MCO's performance against the standard.

Current Ratio

Contractual Requirement: Each LME/MCO shall maintain a Current Ratio above 1.0, as determined from the monthly, quarterly, and annual financial reporting schedules.

The Current Ratio is defined as Current Assets divided by Current Liabilities. Current Assets include any short-term investments that can be converted to cash within five (5) Business Days without significant penalty. A significant penalty is a penalty greater than twenty percent (20%). Current liabilities are obligations whose liquidation is reasonably expected to occur within one year.

If an LME/MCO's Current Ratio falls below 1.0 at any point in time, the entity must submit a report to DHHS that describes the reason for the decline, proposed corrective action to increase the ratio and projections of the impact of the corrective actions.

Defensive Interval Ratio

Contractual Requirement: Each LME/MCO shall maintain a Defensive Interval Ratio above thirty (30) Calendar Days as determined from the monthly, quarterly, and annual financial reporting schedules.

The Defensive Interval is defined as Cash plus Cash Equivalents divided by Average Daily Operating Expenses.

If an LME/MCO's Defensive Interval Ratio falls below 30 days at any point in time, the LME/MCO must submit a report to DHHS that describes the reason for the decline, proposed corrective action to increase the ratio and projections of the impact of the corrective actions.

Capital Reserves

After Tailored Plan launch, if an LME/MCO's capital reserves fall below 9.0% of total expected annual combined Tailored Plan/MDPIHP Medicaid capitation in any quarterly statement, the Tailored Plan must submit a report to DHHS that describes the reason for the decline in capital reserves, proposed corrective action to increase capital reserves and projections of the impact of the corrective actions on the capital reserve levels.

Profit/Loss

Profit or Loss will help determine the current financial position of the LME/MCO but there is no requirement to operate with a profit or certain amount of profit.

The Profit or Loss is defined as Total Revenues minus Total Expenses.

Since there is no specific target for each Plan to meet, no corrective action will be required associated with a Plan's quarterly profit or loss.
