Effective with date of service July 1, 2006, please replace the April 2005 Special Bulletin III, Health Check Billing Guide 2005, with this special bulletin. For your convenience key words and phrases have been bolded or highlighted.

Introduction

Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) or Medicaid for children is administered under the name Health Check in North Carolina. EPSDT is defined by federal law and includes periodic screening, vision, dental, and hearing services. In addition, section 1905 (a) of the Social Security Act (the Act) requires that any medically necessary health care service to correct or ameliorate a defect, physical or mental illness, or a condition identified through a screening listed in section 1905 (a) of the Act be provided to a Medicaid recipient under age 21 even if the service is not available under the state’s Medicaid plan to the rest of the Medicaid population.

EPSDT may cover some services that are not covered for recipients aged 21 and older. Services must be ordered by the recipient’s physician or other licensed clinician. The services cannot be experimental/investigational, unsafe, or ineffective. Prior Approval from the Division of Medical Assistance (DMA) may be required for some services or procedures before they can be provided. If approval is denied or services are reduced or terminated, the recipient or his/her representative can appeal the decision. Instructions for requesting prior approval for covered and non-covered N.C. State Medicaid Plan services can be found on page 14 of this guide.

Note: Prior Approval still applies for services currently requiring Prior Approval. Information regarding Prior Approval can be found on page 14 of this guide.

For additional information about EPSDT refer to the North Carolina Medicaid Special Bulletin, December 2005, Medicaid for Children, Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) and Health Check at [http://www.dhhs.state.nc.us/dma/bulletin/EPSDT.pdf](http://www.dhhs.state.nc.us/dma/bulletin/EPSDT.pdf). Policy Instructions: Early and Periodic Screening, Diagnostic and Treatment including a list of Federal Medicaid Covered Services can also be found at [http://www.dhhs.state.nc.us/dma/epsdt_policy.pdf](http://www.dhhs.state.nc.us/dma/epsdt_policy.pdf).

Health Check Overview

Health Check or EPSDT is important because it:

1. Provides early and regular medical and dental screenings for all Medicaid recipients under the age of 21.
2. Is part of the Federal Medicaid EPSDT requirement that provides recipients with medically necessary health care to correct or ameliorate a defect, physical or mental illness, or a condition identified through a screening examination.

Health Check examinations and other Medicaid covered services are free of charge to the recipient. Health Check recommends regular medical screening examinations (well child check-ups) for a recipient as indicated in the table below. This Periodicity Schedule is only a guideline, and, if a recipient needs to have examinations on a different schedule, the visits are still covered.
Periodicity Schedule

Each Health Check screening component is vital for measuring a child’s physical, mental, and developmental growth. Families are encouraged to have their children receive Health Check screening examinations and immunizations on a regular schedule. All Health Check components are required and must be documented in the child’s medical record. The components are based on the American Academy of Pediatrics (AAP) Recommendations for Preventive Pediatric Health Care and may be found at http://aappolicy.aappublications.org/cgi/content/full/pediatrics;105/3/645.

In addition, it is also the responsibility of each health care provider to assist families in scheduling appointments for timely examinations, to create a quality system to follow-up with families whose children are delinquent for preventive health care examinations, and to make appropriate referrals and requests for medically necessary health care services to correct or ameliorate a defect, physical or mental illness, or a condition identified through a screening examination.

Periodic and Interperiodic Health Check Visits

Periodic Health Check examinations require all age appropriate components including developmental screening, vision screening, hearing screening, and immunizations as needed. Refer to the Periodicity Schedule on page 1 of this guide for recommended age intervals for periodic examinations.

Interperiodic Health Check examinations require all age appropriate components except developmental, hearing, and vision screenings and may be performed outside of the recommended Periodicity Schedule on page 1 of this guide for reasons including but not limited to:

- When a child requires a kindergarten or sports physical outside the recommended schedule.
- When a child’s previously diagnosed physical, mental, or developmental illnesses or conditions require closer monitoring.
- When further assessment, diagnosis, or treatment is needed due to physical or mental illness.
- Upon referral by a health, developmental, or educational professional based on physical or clinical assessment.

Note: Providers must document in the medical record the reason necessitating an interperiodic examination.
Health Check Examination Components

A complete Health Check examination consists of the following age-appropriate components.

- **Comprehensive unclothed physical examination**
  To be performed at every Health Check examination.

- **Comprehensive health history**
  To be performed at every Health Check examination.

- **Nutritional assessment**
  To be performed at every Health Check examination.

- **Anticipatory guidance and health education**
  To be performed at every Health Check examination.

- **Measurements, blood pressure, and vital signs**
  To be performed as age appropriate and medically necessary at every Health Check examination. Height, weight, head circumference, growth chart, BMI (Body Mass Index), and vital signs as age appropriate. Blood pressure is recommended to become part of the preventive health examination beginning at age 3 years old.

- **Developmental screening including mental, emotional, and behavioral**
  To be performed at Periodic examinations at ages 6, 12, and 18 or 24 months, and 3 years, four years, and five years of age using a standardized and validated screening tool. A complete list of appropriate screening tools can be found at [www.dbpeds.org/](http://www.dbpeds.org/). The American Academy of Pediatric’s policy on Developmental Surveillance and Screening can be found at [http://aappolicy.aappublications.org/cgi/content/full/pediatrics;108/1/192](http://aappolicy.aappublications.org/cgi/content/full/pediatrics;108/1/192).

- **Immunizations**
  Immunizations must be provided at the time of a Periodic or Interperiodic examination if needed. It is not appropriate for a Health Check examination to be performed in one location and a child referred to another location or office for immunizations. The *Recommended Childhood and Adolescent Immunization Schedule, by Vaccine and Age - United States, 2006*, approved by the Advisory Committee on Immunization Practices (ACIP), AAP, and the American Academy of Family Physicians (AAFP) may be found at [http://www.cdc.gov/mmwr/preview/mmwrhtml/mm5451-Immunizationa1.htm](http://www.cdc.gov/mmwr/preview/mmwrhtml/mm5451-Immunizationa1.htm).

  **Note:** Please refer to pages 9-13 and 24 in this guide for additional immunization information.

- **Vision screenings**
  Objective screenings must be performed during every periodic examination beginning at age 3. *For children who are uncooperative with a vision screening, providers may ask the parent or legal guardian to bring the child back into the office within a few days for a second attempt at the vision screening.*

- **Hearing screenings**
  Objective screenings must be performed during every periodic examination beginning at age 4. *For children who are uncooperative with a hearing screening, providers may ask the parent or legal guardian to bring the child back into the office within a few days for a second attempt at the hearing screening.*
Health Check Examination Components, continued

Note: If the required vision and/or hearing screenings cannot be performed during a periodic visit due to blindness or deafness and the claim is denied, the claim may be resubmitted through the adjustment process with supporting medical record documentation attached.

- Dental screenings
An oral screening is to be performed at every Health Check examination. **In addition, referral to a dentist is required for every child by the age of 3 years old.** An oral screening performed during a physical examination is not a substitute for examination through direct referral to a dentist. The initial dental referral **must** be provided regardless of the periodicity schedule unless it is known that the child is already receiving dental care. Thereafter, dental referrals should, at a minimum, conform to the dental service periodicity schedule, which is currently one routine dental examination every six months. When any screening indicates a need for dental services at an earlier age (such as baby bottle cares), referrals must be made for needed dental services and documented in the child’s medical record. The periodicity schedule for dental examinations is not governed by the schedule for regular health examinations.

Note: Although not a requirement of a Health Check examination, providers performing a Health Check examination may bill for dental varnishing and receive reimbursement in addition to a Health Check examination. Refer to the August 2002 general Medicaid Bulletin on DMA’s website at [http://www.dhhs.state.nc.us/dma/bulletin/0802bulletin1.htm](http://www.dhhs.state.nc.us/dma/bulletin/0802bulletin1.htm) for billing codes and guidelines.

- Laboratory procedures
Laboratory procedures include Hemoglobin or Hematocrit, Urinalysis, Sickle Cell, Tuberculin Skin Test, and Lead Testing.

Note: **Medicaid will not reimburse separately for these routine laboratory tests when performed during a Health Check examination.**

Hemoglobin or Hematocrit

Hemoglobin or hematocrit **must** be measured once during infancy (preferably between the ages of 9 and 12 months) for all children and once during adolescence for menstruating adolescent females. An annual hemoglobin or hematocrit for adolescent females (ages 11 to 21 years) **must** be performed if any of the following risk factors are present: moderate to heavy menses, chronic weight loss, nutritional deficit or athletic activity.

If there is a documented normal result of a hemoglobin or hematocrit preformed by another provider within three months prior to the date of the Health Check examination, repeating the hemoglobin or hematocrit is not required as part of the Health Check examination unless the provider feels that this test is needed. The result and source of the test must be documented in the child’s medical record.

The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) has specific guidelines for hematocrit/hemoglobin testing. Sharing the test results between the WIC Program and the primary care provider (PCP) is encouraged with appropriate release of information. For more information on requirements and time frames, call the local WIC office.
Health Check Examination Components, continued

Urinalysis
Urinalysis must be performed during the 5 year old Periodic examination as well as during periodic examinations for all sexually active males and females.

Sickle Cell
North Carolina hospitals are required to screen all newborns for sickle cell disease prior to discharge from the hospital. If a child has been properly tested, this test need not be repeated.

Results must be documented in the child's medical record. If the test result of the newborn sickle cell is not readily available, contact the hospital of birth. An infant without documentation of being tested at birth should receive a sickle cell test prior to 3 months of age. If the child is 3 months of age or older, and there is no sickle cell test result in the record, the test should be repeated if the provider feels it is indicated.

Tuberculin Testing (TB)
Reviewing perinatal histories, family and personal medical histories, significant events in life, and other components of the social history will identify children/adolescents for whom TB testing is indicated. If none of the screening criteria listed below are present, there is no recommendation for routine TB screening.

TB testing should be performed as clinically indicated for children/adolescents at increased risk of exposure to tuberculosis, via Purified Protein Derivative (PPD) intradermal injection/Mantoux method – not Tine Test.

Criteria for screening children/adolescents for TB (per the NC TB Control Branch) are:

1. Children/adolescents reasonably suspected of having tuberculosis disease based on clinical symptoms.
2. Perform a baseline screen when these children/adolescents present for care.
   a. Foreign-born individuals arriving within the last five years from Asia, Africa, Caribbean, Latin America, Mexico, South America, Pacific Islands, the Middle East or Eastern Europe. Low prevalence countries for tuberculosis disease are the USA, Canada, Japan, Australia, New Zealand, and countries in Western Europe.
   b. Children/adolescents who are migrants, seasonal farm workers or are homeless.
   c. Children/adolescents who are HIV-infected.
   d. Children/adolescents who inject illicit drugs or use crack cocaine.

Note: Subsequent TB skin testing is not necessary unless there is a continuing risk of exposure to persons with tuberculosis disease.

The North Carolina TB Control Branch is responsible for oversight of testing of household and other close contacts of active cases of pulmonary and laryngeal tuberculosis. Questions related to policy interpretation or other questions related to TB skin testing should be directed to the local health departments.
Health Check Examination Components, continued

- Lead testing
  Federal regulations state that all Medicaid-enrolled children are required to have a blood lead test at 12 and 24 months of age. Children between 36 and 72 months must be tested if they have not been previously tested. Providers should also perform lead testing when otherwise clinically indicated.

  Medical follow-up begins with a blood lead level greater than or equal to 10 ug/dL. Capillary blood level samples are adequate for the initial testing. Venous blood level samples should be collected for confirmation of all elevated blood lead results.

<table>
<thead>
<tr>
<th>Blood Lead Concentration</th>
<th>Recommended Response</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;10 ug/dL</td>
<td>Rescreen at 24 months of age</td>
</tr>
<tr>
<td>10 through 19 ug/dL</td>
<td>Confirmation (venous) testing should be conducted within three months. If confirmed, repeat testing should be conducted every 2 to 4 months until the level is shown to be &lt;10 ug/dL on three consecutive tests (venous or finger stick). The family should receive lead education and nutrition counseling. A detailed environmental history should be taken to identify any obvious sources of exposure. If the blood lead level is confirmed at ≥10 ug/dL, environmental investigation will be offered.</td>
</tr>
<tr>
<td>20 through 44 ug/dL</td>
<td>Confirmation (venous) testing should be conducted within 1 week. If confirmed, the child should be referred for medical evaluation and should continue to be retested every 2 months until the blood lead level is shown to be &lt;10 ug/dL on three consecutive tests (venous or finger stick). Environmental investigations are required and remediation for identified lead hazards shall occur for all children less than 6 years of age with confirmed blood lead levels &gt;20 ug/dL.</td>
</tr>
<tr>
<td>≥45 ug/dL</td>
<td>The child should receive a venous lead test for confirmation as soon as possible. If confirmed, the child must receive urgent medical and environmental follow-up. Chelation therapy should be administered to children with blood lead levels in this range. Symptomatic lead poisoning or a venous lead level &gt;70 ug/dL is a medical emergency requiring inpatient chelation therapy.</td>
</tr>
</tbody>
</table>

State Laboratory of Public Health for Blood Lead Testing
The State Laboratory Services of Public Health will analyze blood lead specimens for all children less than 6 years of age at no charge. Providers requiring results from specimens of children outside this age group should contact the State Laboratory of Public Health at 919-733-3937.

For additional information about lead testing and follow up refer to the North Carolina Lead Screening and Follow up Manual found at http://www.deh.enr.state.nc.us/ehs/Children_Health/printedversionleadmanual.pdf.
IMMUNIZATIONS

Immunization Administration CPT Codes 90471 and 90472 or 90465 and 90466 with the EP Modifier

Medicaid reimburses providers for the administration of immunizations to Medicaid-enrolled children, birth through 20 years of age, as specified below. Always use the EP modifier when billing 90471 and 90472 or 90465 and 90466.

Note: Immunization administration CPT codes 90465 and 90466 must be used when the recipient is less than 8 years of age and is counseled by a physician. Refer to the July 2005 general Medicaid Bulletin on DMA’s website at http://www.dhhs.state.nc.us/dma/bulletin/0705bulletin.pdf for more information.

Private Sector Providers

An immunization administration fee may be billed if it is the only service provided that day or if any immunizations are provided in addition to a Health Check examination or an office visit.

- Administration of one immunization is billed with the administration CPT code 90471 (one unit) or 90465 (one unit) with the EP modifier and is reimbursed at $13.71.
- Additional immunizations are billed with the administration CPT code 90472 or 90466 with the EP modifier and are reimbursed at $13.71.

The maximum reimbursement for two or more immunizations is $27.42 when using both CPT codes 90471 and 90472 or 90465 and 90466. The EP modifier must be listed next to each immunization administration CPT code entered in block 24D of the CMS-1500 claim form. Immunization procedure codes must be reported even if the immunization administration fee is not being billed.

Federally Qualified Health Center or Rural Health Clinic Providers

An immunization administration fee may be billed if it is the only service provided that day or if any immunizations are provided in addition to a Health Check examination. Health Check examinations and the immunization administration fees are billed using the provider’s Medicaid number with the “C” suffix. When billing for immunizations with a Core visit use the provider’s Medicaid number with the “A” suffix.

- Administration of one immunization is billed with the CPT code 90471 (one unit) or 90465 (one unit) with the EP modifier and is reimbursed at $13.71.
- Additional immunizations are billed with the administration CPT code 90472 or 90466 with the EP modifier and are reimbursed at $13.71.

An immunization administration fee cannot be billed in conjunction with a core visit. Report the immunization given during the core visit without billing the administration fee.
Immunizations, continued

Local Health Department Providers

An immunization administration fee may not be billed if the immunization(s) is provided in addition to a Health Check examination. The immunization administration CPT codes 90471 or 90465 with the EP modifier may be billed if immunizations are the only services provided that day or if any immunizations are provided in conjunction with an office visit.

- Administration of one or more immunizations is billed with the CPT code 90471 (one unit) or 90465 (one unit) with the EP modifier and is reimbursed at $27.42.

The immunization administration code is reimbursed at $27.42 regardless of the number of immunizations given. Immunization procedure codes must be reported even if the immunization administration fee is not being billed.

Universal Childhood Vaccine Distribution Program/Vaccines for Children Program

The Universal Childhood Vaccine Distribution Program (UCVDP)/Vaccines for Children (VFC) Program provides at no charge all required (and some recommended) vaccines to North Carolina children birth through 18 years of age according to the recommendations of the Advisory Committee of Immunization Practices (ACIP) of the Centers for Disease Control (CDC). Due to the availability of these vaccines, Medicaid does not reimburse for UCVDP/VFC vaccines for children ages birth through 18. The only exception to this is noted in the table below.

For Medicaid-eligible recipients ages 19 through 20 who are not age-eligible for the VFC program vaccines, Medicaid will reimburse providers for Medicaid-covered vaccines.

The following is a list of UCVDP/VFC vaccines:

<table>

April 2006
Universal Childhood Vaccine Distribution Program/Vaccines for Children Program, continued

A complete list of UCVDP/VFC vaccines is available at [www.immunizenc.com](http://www.immunizenc.com). Providers interested in the coverage criteria can click on "Providers" and select UCVDP coverage criteria.

**Note:** Twinrix (Hep A/B combination) is available at certain ages and under certain criteria through the VFC program. For more information you may contact the Immunization Branch at 919-707-5550 or the Immunization Branch website at [http://www.immunizenc.com](http://www.immunizenc.com).

North Carolina Medicaid providers who are not enrolled in the UCVDP or who have questions concerning the program should call the N.C. Division of Public Health’s Immunization Branch at 1-800-344-0569.

Out-of-state providers (within the 40-mile radius of North Carolina) may obtain VFC vaccines by calling their state VFC program. VFC program telephone numbers for border states are listed below:

- **Georgia** 1-404-657-5013
- **South Carolina** 1-800-277-4687
- **Tennessee** 1-615-532-8513
- **Virginia** 1-804-786-6246
PRIOR APPROVAL (PA) AND REQUESTING NON-COVERED SERVICES

Prior Approval

Certain services require Prior Approval (PA). If a service that requires PA is determined to be medically necessary to correct or ameliorate a defect, physical or mental illness, or a condition during a Health Check examination or other office visit, providers must first obtain PA before providing that service. Services that require PA and instructions for obtaining PA can be found at http://www.dhhs.state.nc.us/dma/bulletin/Section6.pdf. If the service requested is denied, reduced, or terminated the child’s parent or legal representative may appeal the decision on behalf of the child. A letter of decision along with instructions on how to appeal the decision will be mailed to the child’s parent or legal representative. Only recipients and guardians can request an appeal.

Requesting Non-Covered Services

If during a Health Check visit or other office visit a non-covered service is determined to be medically necessary to correct or ameliorate a defect, physical or mental illness, or a condition identified through a screening, providers must complete a Non-Covered Services Request form or provide a letter of medical necessity that includes the information on this form. The form along with instructions may be found at http://www.dhhs.state.nc.us/dma/Forms/NonCoveredServicesRequest.pdf. Mail or fax the Non-Covered Services Request form or letter of Medical Necessity to:

Assistant Director of Clinical Policy and Programs
Division of Medical Assistance
2501 Mail Service Center
Raleigh, NC  27699-2501

FAX:  919-715-7679

If the service requested is denied, reduced or terminated the parent or legal representative may appeal the decision on behalf of the child. A letter of decision along with instructions on how to appeal the decision will be mailed to the child’s parent or legal representative. Only recipients and guardians can request an appeal.
HEALTH CHECK BILLING REQUIREMENTS

Instructions for billing a Health Check examination on the CMS-1500 claim form are the same as when billing for other medical services except for these six critical requirements. The six billing requirements specific to the Health Check Program are as follows:

Requirement 1: Identify and Record Diagnosis Code(s)
Place diagnosis code(s) in the correct order in block 21. Medical diagnoses should always be listed before immunization diagnoses. Immunization diagnoses are required when billing immunization(s) only.

Periodic Health Check Examination – Use V20.2 as the Primary Diagnosis
The primary diagnosis V20.2 is always listed first. Medical diagnoses, if applicable, are listed after the primary diagnosis (V20.2) and always before immunization diagnoses. Immunization diagnoses are required when billing immunization(s) only.

Interperiodic Health Check Examination – Use V70.3 as the Primary Diagnosis
The primary diagnosis V70.3 is always listed first. Medical diagnoses, if applicable, are listed after the primary diagnosis V70.3 and always before immunization diagnoses. Immunization diagnoses are required when billing immunization(s) only.

Requirement 2: Identify and Record Preventive Medicine Code and Component Codes
The preventive medicine CPT code with the EP modifier for Health Check examinations should be billed as outlined below. In addition to billing the preventive medicine code, developmental screening, vision and hearing CPT codes must be listed based on the ages outlined in the tables on page 18.

- A developmental screening CPT code with the EP modifier must be listed in addition to the preventive medicine CPT codes for a periodic Health Check examination when age appropriate. No additional reimbursement is allowed for this code. All providers may refer to sample claims in this guide.

- Vision CPT codes with the EP modifier must be listed on the claim form in addition to the preventive medicine CPT codes for a periodic Health Check examination. No additional reimbursement is allowed for these codes. All providers may refer to sample claims in this guide.

- Hearing CPT codes with the EP modifier must be listed on the claim form in addition to the preventive medicine CPT codes for a periodic Health Check examination. No additional reimbursement is allowed for these codes. All providers may refer to sample claims in this guide.

Requirement 3: Health Check Modifier – EP
The Health Check CPT codes for periodic and interperiodic examinations must have the EP modifier listed in block 24D of the CMS-1500 claim form. The vision, hearing, and developmental screening CPT codes must have the EP modifier listed in block 24D of the CMS-1500 claim form. EP is a required modifier for all Health Check claims.
HEALTH CHECK BILLING REQUIREMENTS, continued

Requirement 4: Record Referrals

All electronically submitted claims should list referral code indicator “E” in block 24H of the CMS 1500 claim form when a referral is made for follow-up on a defect, physical or mental illness, or a condition identified through a Health Check examination. List referral code indicator “F” when a referral is made for Family Planning services.

For providers billing on paper, a referral code indicator is used when a follow-up visit is necessary for a diagnosis detected during a Health Check examination. The indicator “R” should be listed in block 24H of the CMS-1500 claim form when this situation occurs. All providers may refer to sample claims in this guide.

Requirement 5: Next Screening Date
Providers billing on paper may enter the next examination (screening) date (NSD) or have the NSD systematically entered according to the predetermined Medicaid periodicity schedule. Below is an explanation of options for the NSD in block 15 of the CMS-1500 claim form.

Systematically Entered Next Examination Date; Paper Providers
Providers have the following choices for block 15 of the CMS-1500 claim form with a Health Check examination. All of these choices will result in an automatically entered NSD.

- Leave block 15 blank.
- Place all zeros in block 15 (00/00/0000).
- Place all ones in block 15 (11/11/1111).

Claims with systematically entered NSDs will be tracked per the Medicaid periodicity schedule.

Provider-Entered Next Examination Date; Paper Providers
Providers have the option of entering the NSD in block 15. If this date is within the periodicity schedule, the system will keep this date. In the event the NSD is out of range with the periodicity schedule, the system will override the provider’s NSD and the appropriate NSD (based upon the periodicity schedule) will be automatically entered during claims processing.

Note: Providers billing electronically are not required to enter a next examination (screening) date (NSD) for health check screening claims.
Health Check Billing Requirements, continued

Requirement 6: Identify and Record Immunization Administration CPT Code(s) and the EP Modifier

All providers should refer to Billing Guidelines for Immunizations chart in this guide regarding billing immunization administration CPT codes and the EP modifier. All providers may refer to sample claims in this guide.

When billing one immunization, private providers must use the administration CPT code 90471 or 90465 (one unit) with the EP modifier listed in block 24D.

When additional immunizations are provided, private providers must use the administration CPT code 90472 or 90466 with the EP modifier listed in block 24D.

Note: If the EP modifier is not listed in block 24D, the reimbursement rate for the CPT codes 90471 and 90472 or 90465 and 90466 is $0.00.
# ICD-9 AND CPT CODES

The following table lists ICD-9 and CPT codes related to Health Check examinations:

<table>
<thead>
<tr>
<th>Preventive CPT Codes and Modifier</th>
<th>Diagnoses Codes</th>

# PREVENTIVE MEDICINE CPT CODES

The following table lists Preventive Medicine CPT codes that must be listed on the CMS 1500 when filing a claim for a Periodic (V20.2) or an Interperiodic (V70.3) examination. The EP modifier must be listed in block 24D of the CMS 1500 with the appropriate Preventive Medicine code.

</table>
TIPS FOR BILLING

All Health Check Providers

- Two Health Check examinations on different dates of service cannot be billed on the same claim form.

- A formal, standardized developmental screening tool must be used during periodic examinations for children ages 6, 12, 18 or 24 months, and 3, 4, and 5 years of age.

- If the required vision and/or hearing screenings cannot be performed during a periodic visit due to a condition such as blindness or deafness and the claim is denied, the claim may be resubmitted through the adjustment process with supporting medical record documentation attached.

- Report payments received from third party insurance in block 29 of the CMS-1500 claim form when preventive services (well child examinations) are covered. If third party insurance does not cover preventive services, clearly document in the medical record and submit the claim to Medicaid.

Private Sector Health Check Providers Only

- A Health Check examination and an office visit with different dates of service cannot be billed on the same claim form.

- A Health Check examination and an office visit cannot be paid initially on the same date of service. One claim will pay and the other will deny. For the denied claim to be reconsidered, it must be submitted as an adjustment with medical justification and a copy of the Remittance and Status Report (RA) denial attached.

- Immunization administration CPT code 90471 or 90465 with the EP modifier and 90472 or 90466 with the EP modifier can be billed with a Health Check examination, office visit or if it is the only service provided that day. When billing in conjunction with a examination CPT code or an office visit code, an immunization diagnosis is not required in block 21 of the claim form. When billing the administration code for immunizations (90471 or 90465 with the EP modifier and 90472 or 90466 with the EP modifier) as the only service for that day, providers are required to use an immunization diagnosis in block 21 of the claim form. Always list immunization CPT procedure codes when billing 90471 or 90465 with the EP modifier and 90472 or 90466 with the EP modifier. Refer to sample claims in this guide.

- When checking claim status using the Automated Voice Response (AVR) system (1-800-723-4337), AVR requires providers to enter the total amount billed. Due to each Health Check claim being divided into two separate claims for tracking purposes, the total amount billed must also be split between the amount billed for the Health Check examination and the amount billed for immunizations and any other service billed on the same date of service. Thus, it is necessary to check claim status for two separate claims.
**Federally Qualified Health Center (FQHC) and Rural Health Clinic (RHC) Providers Only**

- FQHCs and RHCs must bill Health Check services using their Medicaid provider number with the “C” suffix.

- When billing for immunizations with a core visit use the provider’s Medicaid number with the “A” suffix.

- A Health Check examination and a core visit cannot be paid initially on the same date of service. One claim will pay and the other will deny. For the denied claim to be reconsidered, it must be submitted as an adjustment with medical justification and a copy of the Remittance and Status Report (RA) denial attached.

- Immunization administration CPT code 90471 or 90465 with the EP modifier and 90472 or 90466 with the EP modifier can be billed if it is provided in addition to a Health Check examination CPT code or if it is the only service provided that day. When billing in conjunction with an examination code, an immunization diagnosis is not required in block 21 of the claim form. When billing the administration code for immunizations (90471 or 90465 with the EP modifier and 90472 or 90466 with the EP modifier) as the only service for that day, an immunization diagnosis code is required to be entered in block 21 of the claim form. The administration code for immunizations cannot be billed in conjunction with a core visit. For reporting purposes, list immunization procedure codes in the appropriate block on the claim form. Always list immunization procedure codes when billing 90471 or 90465 with the EP modifier and 90742 or 90466 with the EP modifier. Refer to sample claims in this guide.

**Local Health Departments**

- Two Health Check examinations on different dates of service cannot be billed on the same claim form.

- A formal, standardized developmental screening tool must be used during periodic examinations for children ages 6 months, 12 months, 18 or 24 months, and 3, 4, and 5 years of age.

- If the required vision and/or hearing screenings cannot be performed during a periodic visit due to a condition such as blindness or deafness and the claim is denied, the claim may be resubmitted through the adjustment process with supporting medical record documentation attached.

- When billing immunization administration CPT codes 90471 or 90465, the EP modifier must be entered in data field on the HSIS Services Screen to receive the reimbursement rate of $27.42. If the EP modifier is not entered the reimbursement will be $0.00 per unit. The reimbursement for these codes is $3.41 per unit for non-Health Check related services. There is no additional reimbursement for CPT immunization administration codes 90472 or 90466.
HEALTH CHECK COORDINATORS

Health Check Coordinators (HCCs) are available to assist both parents and providers in assuring that Medicaid-eligible children have access to Health Check services.

HCCs currently provide assistance to 91 North Carolina counties and the Qualla Boundary. HCCs are housed in local health departments, community and rural health centers, and other community agencies. A list of counties with HCCs is available on the DMA website at http://www.dhhs.state.nc.us/dma/ca/hcc.pdf.

The roles of the HCC includes but are not limited to the following:

- Using the Health Check Automated Information and Notification System (AINS) for identifying and following Medicaid-eligible children, birth through 20 years of age, with regard to services received through the health care system
- Educating families about the importance of establishing a medical home for their children
- Assisting families to use the health care services in a consistent and responsible manner
- Assisting with scheduling appointments or securing transportation
- Acting as a local information, referral, and resource person for families
- Providing advocacy services in addressing social, educational or health needs of the recipient
- Initiating follow-up as requested by providers when families need special assistance or fail to bring children in for Health Check or follow-up examinations
- Promoting Health Check and health prevention with other public and private organizations

Physicians, primary care providers (PCPs), and their office staff are encouraged to establish a close working relationship with HCCs. Ongoing communication significantly enhances recipient participation in Health Check and helps make preventive health care services more timely and effective.

FEDERAL MEDICAID COVERED SERVICES--42 U.S.C. § 1396d(a)

Inpatient hospital services (other than services in an institution for mental disease)
Outpatient hospital services
Rural health clinic services (including home visits for homebound individuals)
Federally-qualified health center services
Other laboratory and X-ray services (in an office or similar facility)
EPSDT (Note: EPSDT offers periodic screening services for recipients under age 21 and Medicaid covered
services necessary to correct or ameliorate a diagnosed physical or mental condition)
Family planning services and supplies
Physician services (in office, patient's home, hospital, nursing facility, or elsewhere)
Medical and surgical services furnished by a dentist
Home health care services, including nursing services, home health aides, medical supplies and equipment, physical therapy, occupation therapy, speech pathology, audiology services
Private duty nursing services (in the home, hospital, and/or skilled nursing facility)
Clinic services (including services outside of clinic for eligible homeless individuals)
Dental services
Physical therapy and related services (includes occupational therapy and services for individuals with speech, hearing, and language disorders)
Prescribed drugs
Dentures
Prosthetic devices
Eyeglasses
Other diagnostic, screening, preventive, and rehabilitative services, including medical or remedial services recommended for the maximum reduction of physical or mental disability and restoration of an individual to the best possible functional level (in facility, home, or other setting)
Services in an intermediate care facility for the mentally retarded
Inpatient psychiatric hospital services for individuals under age 21
Services furnished by a midwife, which the nurse-midwife is legally authorized to perform under state law, without regard to whether or not the services are performed in the area of management of the care of mothers and babies throughout the maternity cycle
Hospice care
Case-management services
TB-related services
Respiratory care services
Services furnished by a certified pediatric nurse practitioner or certified family nurse practitioner, which the practitioner is legally authorized to perform under state law
Personal care services (in a home or other location) furnished to an individual who is not an inpatient or resident of a hospital, nursing facility, intermediate care facility for the mentally retarded, or institution for mental disease
Primary care case management services
Any other medical care, and any other type of remedial care recognized under state law, specified by the secretary (includes transportation)

01/28/05
BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND CHAMPUS PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and confirm that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to request Medicare medical and nonmedical information, including employment status, and whether the person has employer group health insurance, liability, no-fault worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.2(a). If Item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown in Medicare assigned or CHAMPUS participator capacity, that the physician agrees to accept the charge determination of the Medicare carrier or CHAMPUS fiscal intermediary if this is less than the charge submitted. CHAMPUS is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned in "Insured," i.e., Items 1a, 4, 6, 7, 9, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, CHAMPUS, FECA AND BLACK LUNG)

I certify that the services shown on this form were medically indicated and necessary for the health of the patient and were personally furnished by me or were furnished incident to my professional service by my employee under my immediate personal supervision, except as otherwise expressly permitted by Medicare or CHAMPUS regulations.

For services to be considered "incident" to a physician's professional service, 1) they must be rendered under the physician's immediate personal supervision by his/her employee, 2) they must be an integral part of the services covered by the physician's services, 3) they must be of a type commonly furnished in the physician's offices, and 4) the services of nonphysicians must be included on the physician's bills.

For CHAMPUS claims, I further certify that I (or any employee) who rendered services are an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, or other civilian or military (refer to 5 USC 5536). For Black Lung claims, I further certify that the services were rendered for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may be subject to conviction for false statements or other such penalties under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, CHAMPUS, FECA, AND BLACK LUNG INFORMATION

We are authorized by HCFA, CHAMPUS and OWCP to ask you for information needed in the administration of the Medicare, CHAMPUS, FECA and Black Lung programs. Authority to collect information is in section 105(a), 1962, 1972 and 1974 of the Social Security Act as amended, 42 CFR 411.24(a), and 424.5(b), and 44 USC 58.101 et seq and 19 USC 1028 and 1966 5 USC 8101 et seq. and 19 USC 901 et seq, 38 USC 613. E.O. 9397.

We hold the information obtained on this form is used to identify you and your eligibility. It is also used to decide if the services and supplies you receive are covered by these programs and to ensure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies for the purpose of administering Federal provisions that require other third parties to pay primary to Federal programs, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine used for information contained in systems of records.

FOR CHAMPUS CLAIMS: PRINCIPLE PURPOSES: To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under CHAMPUS/CHAMPSVA, to the Dept. of Justice for representation of the Secretary of Defense in civil actions, to the Internal Revenue Service, private collection agencies, and consumer reporting agencies. It may also be used to establish eligibility for, and to determine the benefits, of non-Federal programs. In certain cases, such as those involving non-Federal programs, access to this information may be provided to a participant in the Federal Government's Freedom of Information Act program.

DISCLOSURES: Voluntary; however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception disclosed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 11928 of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988," permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to accommodate the requirements for the submission of reports to the State's Title XIX plan to furnish information regarding any payments made or to be made; providing such services as the State Agency or Dept. of Health and Human Services may require.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted under that program, with the exception of authorized deductible, coinsurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements or deceptions or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

Publishing burden for this collection of information is estimated to average 15 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate of any other aspect of the collection of information, including suggestions for reducing the burden, to HCFA, Office of Management and Budget, Paperwork Reduction Project (OMB-0938-0009), Washington, D.C. 20503.
