

Individual Methodology for Patient Volume Reporting

At a single location...

Dr. Jones

Raleigh location of ABC Healthcare

Dr. Jones has two options for reporting Patient Volume using individual methodology for a single location:

1. She can report the number of encounters she (and she alone) has had in a consecutive 90-day period; or,
2. She can report the number of patient encounters that she has had, **and** the patient encounters of staff she directly supervises, during the same consecutive 90-day period .

In other words, if Dr. Jones supervises any staff, such as X-Ray Technicians, Registered Nurses, Lab Technicians, etc., she can count their total patient encounters toward meeting her patient volume threshold.

Regardless of the encounters Dr. Jones chooses to count toward Patient Volume, she will need to be consistent in applying the encounters in both the numerator and denominator.
