## Out of State Pharmacy Lists Now Posted & Updated Daily on NCTracks

NC Medicaid is committed to ensuring continued access to care for NC Medicaid beneficiaries. As a service to both NC Medicaid beneficiaries and providers, NCTracks has created a webpage listing of all enrolled out of state (OOS) pharmacies, categorized by state. To download the list for a particular state, click the corresponding link within the table. This data will be updated on a daily basis.

The link can be found on the [public facing NCTracks Member webpage](#) under Quick Links.

Logging into NCTracks is not required to access the Recipient webpage where the Out -of –State Enrolled Pharmacies List is found under Quick Links.

## Update on the Vaccine for Children Program for Displaced NC Medicaid Beneficiaries

*Children with NC Medicaid temporarily living in another state can get a free Vaccine for Children (VFC) vaccine from any VFC provider in that state. The VFC program is a federal program that gives free vaccines to children ages 18 and under.*

In other states, VFC providers, are able to give vaccines to NC Medicaid beneficiaries. VFC providers can include local health departments, Federally Qualified Health Centers (FQHCs) and pediatrician offices. A pharmacy may be a VFC provider, depending on the state.

Parents of children eligible for VFC can visit the Center for Disease Control’s website to find a list of [local health departments by cities and counties](#) in their area. If parents need help, they may contact the [VFC Program Manager](#) in each state. A list of managers is available to help parents find the VFC program manager in each state. The list can be found at [VFC Program Manager](#).

For more information, please visit [Vaccines for Children \(VFC\) Program: Information for Parents](#) webpage.

When a PDL class has a preferred brand with a non-preferred generic, providers requesting prior approval for the non-preferred generic should give a clinical reason why the beneficiary cannot use the brand.

### 72-Hour Emergency Supply Available for Pharmacy Prior Authorization Drugs

Pharmacy providers are encouraged to use the 72-hour emergency supply allowed for drugs requiring prior approval. **Federal law requires that this emergency supply be available to Medicaid beneficiaries for drugs requiring prior approval** (Social Security Act, Section 1927, [42 U.S.C. 1396r-8\(d\)\(5\)\(B\)](#)). Use of this emergency supply will ensure access to medically necessary medications.

The system will bypass the prior approval requirement if an emergency supply is indicated. **Use a “3” in the Level of Service field (418-DI) to indicate that the transaction is an emergency fill.**

**Note:** Copayments will apply. There is no limit to the number of times the emergency supply can be used.
